The Forestry Boost

A TIMBER TRACKING WORKSHOP POWERED BY LOGSCOM AND UNIVERSITÄT FREIBURG

19 to 20th of FEBRUARY 2026

Traceability from forest to final product is becoming essential for transparency, sustainability, and EUDR compliance. This two-day workshop presents practical technologies and real-world applications.

You are warmly invited to a focused event on digital traceability, data precision, and transparency across the timber supply chain. Discover the latest technologies, practical applications, and research insights, shaping the industry's digital future.

Key Topics

- Individual log marking, live demo & practice
- Machine-based measurement & data precision
- Identification of tagged logs
- Digital data capture and transfer
- Blockchain and product passports
- Field insights from active users
- Current research on digital traceability
- User cases for transparency
- Logscoms customers, i.e. loggers, meetup

February 19–20, 2026 09:00 – 16:30 each day
Dinner night on Thursday, 19th
Barbecue on Friday 20th after The Forestry Boost Meetup
Logscom AB, Blåviksvägen 11, 919 31 Åsele, Sweden
